

RAVI RANJAN UPADHYAY

Full Stack Architect | Java-Microservice,AWS,Kafka,Spring Boot · Kubernetes · React JS | 14.5+ Years

Bangalore, India | +91 8125328360 | raviupa709@gmail.com | Immediate Joiner | Open to Pune / Bangalore

PROFESSIONAL SUMMARY

Full Stack Java Architect and Technical Lead with 14.5+ years designing and delivering enterprise platforms using Java, Spring Boot, Spring Cloud microservices, REST APIs, Apache Kafka, React.js, Docker, Kubernetes/OpenShift, AWS, Terraform, GitOps (Argo CD), and OAuth 2.0 / OIDC security. Hands-on owner of HLD/LLD reviews, event-driven integrations, API gateway patterns, Dynatrace observability, and CI/CD across Insurance, Healthcare, Media, and Finance. Mentors senior engineers and leads; drives architecture standards, secure design, and cloud-native delivery for high-volume, event-driven systems.

CORE ARCHITECTURE COMPETENCIES

Architecture: Microservices Architecture, HLD/LLD Design & Review, Event-Driven Design, API Gateway Patterns, Service Decomposition, Domain-aligned Modular Design, Architecture Standards & Governance

Backend Platform: Java 8/11+, Spring Boot, Spring Cloud, Spring Security, Spring Data JPA, Hibernate, Feign Client, REST Microservices, Asynchronous Processing, Batch Pipelines

Integration & Messaging: Apache Kafka (Producers/Consumers), Event Streaming, REST API Design, Third-party / Downstream API Integration, OAuth 2.0, OIDC, JWT/Bearer, Okta, Microsoft Entra ID (B2E)

Cloud & Platform Eng.: AWS (EC2, S3, Lambda, API Gateway, CloudFront, WAF, ROSA), Docker, Kubernetes, OpenShift, Terraform, Argo CD (GitOps), Jenkins CI/CD, Blue-Green Deployments

Observability & Quality: Dynatrace, Centralized Logging, Health Checks, SonarQube, JUnit, Mockito, Code Reviews, Production Incident Governance

Frontend (supporting): React.js SPA, JavaScript — API-first UI integration with secured backends

Leadership: Mentoring Tech Leads & Senior Developers, Cross-team Design Reviews, Agile/Scrum, Estimation, Risk Analysis

PROFESSIONAL EXPERIENCE

Technical Lead — Platform & Solution Architecture | **HTC Global Services Pvt Ltd** | Jan 2024 – Present

State Farm – Mortgage Record Change System (MRCS) | Lender Relations | Jan 2025 – Present

- Owned end-to-end MRCS architecture: React SPA through CloudFront/WAF and Spring Cloud Gateway (LIG) to downstream microservices.
- Defined API contracts and secured integration patterns using Microsoft Entra ID B2E (OAuth 2.0/OIDC) Bearer tokens across gateway and providers.
- Architected lender search (account / name-address) and address-based third-party region lookups; guided implementation from legacy behavior analysis.

Tech: Java, Spring Boot, Spring Cloud Gateway, OAuth 2.0/OIDC, Entra ID B2E, REST, React.js, AWS CloudFront/S3/WAF

State Farm – Cloud Platform Migration, Eventing & Observability Architecture | Jan 2024 – Present

- Drove platform architecture for migrating Spring Boot services to AWS ROSA (OpenShift on AWS); defined environment strategy, scaling, and resilience patterns.
- Designed Kafka-based event-driven pipelines to decouple microservices and support near-real-time processing under production load.
- Established GitOps-style delivery with Argo CD blue-green releases; authored Kubernetes deployment standards for Spring Boot workloads.
- Implemented observability and alerting architecture using Dynatrace + Terraform, reducing MTTR and enforcing operational governance.
- Mentored engineers on cloud-native patterns, API gateway boundaries (Lambda/API Gateway), and production readiness checklists.

Tech: Java, Spring Boot, Kafka, AWS ROSA/Lambda/API Gateway/EC2/S3, Kubernetes, OpenShift, Terraform, Argo CD, Dynatrace, Docker

Ancestry.com – Media Platform Architecture Modernization | Apr 2023 – Dec 2023

- Led architecture upgrade of Media 360 / image-processing APIs (Java 8 → 11) with zero-downtime rollout and security hardening.
- Spearheaded EC2-to-OpenShift microservice migration, defining deployment, security, and horizontal scaling blueprints.
- Introduced Kafka event streaming architecture for media record synchronization across independently deployable services.
- Consolidated repositories into a monorepo CI/CD model; reviewed HLDs/LLDs for service boundaries and authentication (MFA portal).

Tech: Java 11, Spring Boot, Microservices, Kafka, REST, AWS EC2/S3, OpenShift, Docker, Kubernetes, Dynatrace

Technical Lead — Microservices Architecture | **Xebia IT Architects Pvt Ltd** | Jul 2022 – Mar 2023

MATT – Branch Exam Platform | Jul 2022 – Mar 2023

- Architected domain-aligned Spring Boot microservices and REST API layers for Branch Job / MATT workflows (HLD/LLD ownership).
- Designed async service patterns and Excel batch import pipelines for hierarchical data with validation and failure isolation.
- Led design reviews, coding standards, and mentoring for cross-functional senior developers.

Tech: Java, Spring Boot, Spring Data JPA, REST Microservices, Async APIs, Batch, SQL

Technical Lead — Backend Architecture & Security | **Tech Mahindra Pvt Ltd** | Feb 2022 – Jun 2022

MGM – Identity & Finance Platform | Feb 2022 – Jun 2022

- Architected Okta OAuth 2.0 / OIDC + Spring Security reference model for microservice authentication and RBAC.
- Designed User Roles and Month-End finance microservices with clear bounded contexts and API contracts.

Tech: Java, Spring Boot, Spring Security, Okta, OAuth 2.0, OIDC, JPA, REST

Technical Lead — Microservices Transformation | **Tech Mahindra Pvt Ltd** | May 2021 – Jan 2022

SetPlex – Monolith to Microservices (Media) | May 2021 – Jan 2022

- Owned decomposition architecture of media monolith into Spring Cloud microservices with Feign-based inter-service communication.
- Defined logging/health-check standards (AOP) and quality gates (Mockito/Sonar-aligned) as reusable platform practices.

Tech: Java, Spring Boot, Spring Cloud, Feign Client, Microservices, REST

Technical Lead (Team of 6-8) | **Napier Healthcare Solutions Pvt Ltd** | Aug 2019 – Dec 2020

Healthcare HIS – Microservices Architecture Transformation | Aug 2019 – Dec 2020

- Led architecture classification and migration of hospital monolith (IP/OP/Pharmacy/Lab/Inventory) to Spring Boot microservices.

Tech: Java 8, Spring Boot, Spring Cloud, Feign Client, REST Microservices

Technical Lead (Team of 8) | **Napier Healthcare Solutions Pvt Ltd** | Nov 2016 – Aug 2019

Healthcare HIS – Core Product & Delivery Governance | Nov 2016 – Aug 2019

- Directed a team of eight engineers in implementing rigorous design reviews and estimation processes, upholding 90%+ unit-test standards for Java/Spring/Hibernate projects.

Tech: Java, Spring, Hibernate, SQL, JUnit, Mockito, Agile

Senior Developer → Software Developer | **Napier Healthcare** | Aug 2011 – Oct 2016

- Delivered enterprise healthcare features (MU2 36/36 certification, HL7 messaging) and full-stack Java/Spring modules foundational to later architecture leadership.

Tech: Java, Spring, Hibernate, SQL Server, HL7, JavaScript

KEY ARCHITECTURE ACHIEVEMENTS

- Defined and delivered multi-service platform topologies (gateway + secured APIs + event streaming) for State Farm Lender Relations / cloud programs.
- Led monolith-to-microservices programs (Healthcare HIS, SetPlex, Ancestry), improving deployability and team autonomy.
- Institutionalized GitOps/Kubernetes via Argo CD, Terraform alerting, and Dynatrace observability, reducing downtime by 15%.
- Established OAuth 2.0/OIDC security architectures (Okta, Entra B2E) and zero-downtime Java platform upgrades (8 → 11).

EDUCATION

Master of Computer Applications (MCA) — Dr. Ambedkar Institute of Technology, Bangalore (VTU) | 2010

TARGET ROLE / AVAILABILITY

Target: Java Architect (Platform / Solution Architecture). Locations: Bangalore / Pune. Notice: Immediate joiner. Strong fit: Java, Spring Boot, Spring Cloud, Kafka, REST, Docker, Kubernetes, Terraform, Argo CD, OAuth2/OIDC, Dynatrace, Microservices architecture leadership.
