

RAVI RANJAN UPADHYAY

Full Stack Architect | Java-Microservice,AWS,Kafka,Spring Boot · Kubernetes · React JS | 14.5+ Years

Bangalore, India | +91 8125328360 | raviupa709@gmail.com | Immediate Joiner | Open to Pune / Bangalore

PROFESSIONAL SUMMARY

Full Stack Java Architect and Technical Lead with 14.5+ years designing, developing, and maintaining scalable Spring Boot microservices and REST APIs. Owns HLD (architecture, service boundaries, data flow, integration) and LLD (API contracts, database schemas, OOP, design patterns). Architects cloud-native apps on AWS using S3, EC2, Lambda, API Gateway, SQS/SNS, and container orchestration (Kubernetes/OpenShift/Amazon ECS-style services, tasks, and scaling). Designs event-driven Kafka microservices with CI/CD (Git, Jenkins), production debugging, performance tuning, monitoring, and incident response. Mentors engineers in Agile/Scrum; partners with product and architecture teams across Insurance, Healthcare, Media, and Finance.

CORE ARCHITECTURE COMPETENCIES

Architecture: Microservices, HLD/LLD, Distributed Systems, Load Balancing, Caching, Message Queues, Event-Driven Design, API Gateway, Service Boundaries, Data Flow, Integration Patterns, Design Patterns, Scalability, Fault Tolerance

Backend Platform: Java 8/11/17, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, OOP, Design Patterns, REST APIs, Microservices, API Contracts, Database/Schema Design, Asynchronous Processing, Batch Pipelines

Integration & Messaging: Apache Kafka (Producers/Consumers), Event Streaming, REST API Design, Third-party / Downstream API Integration, OAuth 2.0, OIDC, JWT/Bearer, Okta, Microsoft Entra ID (B2E)

Cloud & Platform Eng.: AWS S3 (storage, access management), Amazon ECS / Kubernetes / OpenShift (container orchestration, scaling), EC2, Lambda, SQS/SNS, API Gateway, CloudWatch, Docker, Jenkins CI/CD, Git, Terraform, Argo CD

Observability & Quality: Dynatrace, CloudWatch, Capacity Planning, Monitoring, Incident Response, JUnit, Mockito, Code Reviews, SonarQube, Production Debugging, Performance Optimization, Clean Maintainable Code

Frontend (supporting): React.js SPA, JavaScript — API-first UI integration with secured backends

Leadership: Mentoring Tech Leads & Senior Developers, Cross-team Design Reviews, Agile/Scrum, Estimation, Risk Analysis

PROFESSIONAL EXPERIENCE

Technical Lead — Platform & Solution Architecture | **HTC Global Services Pvt Ltd** | Jan 2024 – Present

State Farm – Mortgage Record Change System (MRCS) | Lender Relations | Jan 2025 – Present

- Architected MRCS microservices topology: React SPA through CloudFront/WAF and Spring Cloud Gateway (LIG) to independently deployable backend services.
- Defined REST API contracts and OAuth 2.0/OIDC (Entra ID B2E) Bearer-token security across the API gateway and downstream microservice providers.
- Architected lender-search microservices (account / name-address) and third-party region APIs, converting legacy workflows into reusable service boundaries.

Tech: Java, Spring Boot, Spring Cloud Gateway, OAuth 2.0/OIDC, Entra ID B2E, REST, React.js, AWS CloudFront/S3/WAF

State Farm – Cloud Platform Migration, Eventing & Observability Architecture | Jan 2024 – Present

- Spearheaded Spring Boot microservices migration to AWS ROSA/OpenShift; defined environment strategy, auto-scaling, and resilience patterns for cloud-native delivery.
- Designed Apache Kafka producer/consumer pipelines to decouple microservices and enable near-real-time event processing under production load.
- Established Argo CD GitOps blue-green releases and Kubernetes standards for Spring Boot microservice workloads with zero-downtime deployments.
- Implemented Dynatrace + Terraform alerting for microservice platforms, reducing MTTR and enforcing production operational governance.
- Mentored engineers on microservice design, Kafka eventing, and API gateway boundaries (Lambda/API Gateway) with production-readiness checklists.

Tech: Java, Spring Boot, Kafka, AWS ROSA/Lambda/API Gateway/EC2/S3, Kubernetes, OpenShift, Terraform, Argo CD, Dynatrace, Docker

Ancestry.com – Media Platform Architecture Modernization | Apr 2023 – Dec 2023

- Led zero-downtime Java 8-to-11 upgrade of Media 360 microservice APIs, improving performance and closing security vulnerabilities.
- Spearheaded EC2-to-OpenShift microservice migration, defining deployment, security, and horizontal scaling blueprints.
- Built Kafka event-streaming so media-record events sync in real time across independently deployable microservices.
- Consolidated Git repositories into a monorepo CI/CD model; reviewed HLD/LLD microservice boundaries and MFA authentication for secured APIs.

Tech: Java 11, Spring Boot, Microservices, Kafka, REST, AWS EC2/S3, OpenShift, Docker, Kubernetes, Dynatrace

Technical Lead — Microservices Architecture | **Xebia IT Architects Pvt Ltd** | Jul 2022 – Mar 2023

MATT – Branch Exam Platform | Jul 2022 – Mar 2023

- Architected domain-aligned Spring Boot microservices and REST API layers for Branch Job / MATT workflows (HLD/LLD ownership).
- Designed async service patterns and Excel batch import pipelines for hierarchical data with validation and failure isolation.
- Led design reviews, coding standards, and mentoring for cross-functional senior developers.

Tech: Java, Spring Boot, Spring Data JPA, REST Microservices, Async APIs, Batch, SQL

Technical Lead — Backend Architecture & Security | **Tech Mahindra Pvt Ltd** | Feb 2022 – Jun 2022

MGM – Identity & Finance Platform | Feb 2022 – Jun 2022

- Architected Okta OAuth 2.0 / OIDC + Spring Security reference model for microservice authentication and RBAC.
- Designed User Roles and Month-End finance microservices with clear bounded contexts and API contracts.

Tech: Java, Spring Boot, Spring Security, Okta, OAuth 2.0, OIDC, JPA, REST

Technical Lead — Microservices Transformation | **Tech Mahindra Pvt Ltd** | May 2021 – Jan 2022

SetPlex – Monolith to Microservices (Media) | May 2021 – Jan 2022

- Owned decomposition architecture of media monolith into Spring Cloud microservices with Feign-based inter-service communication.
- Defined logging/health-check standards (AOP) and quality gates (Mockito/Sonar-aligned) as reusable platform practices.

Tech: Java, Spring Boot, Spring Cloud, Feign Client, Microservices, REST

Technical Lead (Team of 6-8) | **Napier Healthcare Solutions Pvt Ltd** | Aug 2019 – Dec 2020

Healthcare HIS – Microservices Architecture Transformation | Aug 2019 – Dec 2020

- Led architecture classification and migration of hospital monolith (IP/OP/Pharmacy/Lab/Inventory) to Spring Boot microservices.

Tech: Java 8, Spring Boot, Spring Cloud, Feign Client, REST Microservices

Technical Lead (Team of 8) | **Napier Healthcare Solutions Pvt Ltd** | Nov 2016 – Aug 2019

Healthcare HIS – Core Product & Delivery Governance | Nov 2016 – Aug 2019

- Directed a team of eight engineers in implementing rigorous design reviews and estimation processes, upholding 90%+ unit-test standards for Java/Spring/Hibernate projects.

Tech: Java, Spring, Hibernate, SQL, JUnit, Mockito, Agile

Senior Developer → Software Developer | **Napier Healthcare** | Aug 2011 – Oct 2016

- Delivered enterprise healthcare features (MU2 36/36 certification, HL7 messaging) and full-stack Java/Spring modules foundational to later architecture leadership.

Tech: Java, Spring, Hibernate, SQL Server, HL7, JavaScript

KEY ARCHITECTURE ACHIEVEMENTS

- Defined and delivered multi-service platform topologies (gateway + secured APIs + event streaming) for State Farm Lender Relations / cloud programs.
- Led repeated monolith → microservices architecture programs (Healthcare HIS, SetPlex, Ancestry) improving deployability and team autonomy.
- Institutionalized GitOps/Kubernetes delivery (Argo CD), Terraform-backed alerting, and Dynatrace observability — cutting downtime ~15%.
- Established OAuth 2.0/OIDC security architectures (Okta, Entra B2E) and zero-downtime Java platform upgrades (8 → 11).

EDUCATION

Master of Computer Applications (MCA) — Dr. Ambedkar Institute of Technology, Bangalore (VTU) | 2010

TARGET ROLE / AVAILABILITY

Target: Senior Java / Spring Boot Microservices (HLD & LLD). AWS S3, ECS/Kubernetes, Kafka, REST, CI/CD, Git.

Locations: Bangalore / Pune. Immediate joiner. 14.5+ years backend. Mentoring + Agile/Scrum. Event-driven pipelines.
